

Type MV-105 Power Cables

2.4kV UL type MV-105, EPR insulation, PVC jacket

APPLICATION

For use in power and distribution in open air, conduit and cable tray. Used for applications in chemical plants, refineries and industrial applications. UL approved for use at 105C for continuous operation. Suitable for Class I, Div. 2 hazardous areas

Specifications

- **Conductor:** Soft bare annealed copper
- **Insulation:** EPR
- **Outer Sheath:** Sunlight-resistant PVC
- **Temp. Rating:** 105 degrees C max conductor operation temperature.
- **Voltage Rating:** 2.4kV

This is one of many type of Type MV cable. Please contact Ex Industries for more information.
